

## Company Profile

### What We Do

We are your go-to source for PM consulting and PM training in Australia, India and the APAC region. We offer project management consulting solutions to bring efficiencies in PMO operations, projects / programs delivery, portfolio management and Benefits Realisation solutions.

We also offer truly world-class training services. Every trainer is supported by well-researched materials and real-world examples, in most cases our trainers have written the training programs bringing depth of their understanding with them and this ensures that each student understands all of the concepts presented in a class.

But, we don't stop there. On the technology front, we shall soon be offering solutions to enhance your productivity, efficiency, and compliance.

Our experienced team offers the vision, leadership, and guidance needed for successful project outcomes through a flexible and dynamic approach. We will ensure that projects we undertake for your organisation are finished to your satisfaction.

### Four Pillars of Our Consulting Services:

#### 1. PMO Solutions

At PCS we believe PMO should be an integral part of the organisation to navigate the organisation like a ship instead of scattered boats, how do we achieve that?

#### 2. Benefits Realisation Solutions

Each Project / Investment must deliver benefits for the organisation. Measuring these benefits is a big challenge! Our consultants can show the way.

#### 3. Talent Solutions

We deliver quality talent for our clients with integrity.

#### 4. PM Training

PCS offers truly world class training through our highly experienced trainers. Some of our trainers currently teach such training programs at most reputed universities.

## Our Approach

As a small, focused and agile organisation, we believe in continuous improvement and understand that project management takes shape and matures over time as an organisation itself is maturing. Patience and consistent effort create the foundation for eventual success and measurable results.

By learning from the mistakes made by various organisations, we can help you avoid some of the most common pitfalls. Our expert consultants bring extensive industry experience to your organisation. Working collaboratively, we can help your business mature and identify and avoid possible points of failure.

## Our PMO Services

"Every PMO must find its own path in line with an organisation's culture and Strategy."

We can guide your team to help create a high-performing PMO and achieve your goals through our specialized consulting services. Our services include the following:

### PMO Setup & Operation

- PMO setup
- Improve PMO capability
- Operation of PMO — consultants (to advise on operation or for operation of PMO)
- Methodology review, improvement & development
- Reporting mechanisms — setup & review

### Project Planning & Delivery

- Projects coordination, projects & program delivery, portfolio management
- Advise on improved governance of project investments
- Project reviews & health checks
- Troubled project recovery
- Mentoring & coaching of project managers or sponsors
- Transition & transformation consultants
- Competency assessment with assistance to plan for and fill the gaps

### Project Management Training

- Training for PMO, projects & program managers
- Corporate training programs
- Public training program

Visit the Training Page on this site for more information.

### Other Consulting Services

- Business case development

## PMO Outsourcing Service

This is an outsourced PMO support function service that will help reduce your cost of delivery for PMO services without losing control over your internal operations and functions.

This is a new avenue for us — we're happy to consider additional options that our clients want to explore.

- Knowledge management
- Project coordination
- Support projects & program managers
- Projects planners & schedulers
- Transition & transformation consultants
- Tool implementation/management/maintenance
- Reporting — generation & distribution of reports

## PMO Outsourcing — Backend Operation Service

The cost of running a PMO is always under the microscope, and as a result, pressure on PMO managers mounts to continue to show the value of PMOs. And that's not all. Other difficulties in managing a PMO include finding resources that can deliver the needed first-class service with enthusiasm, day in and day out. People within the organisation stop seeing the growth as their focus shifts to direct project management, avoiding the maintenance that goes into effective PMO operations.

We can help take all these concerns away from you by outsourcing the backend operation of a PMO to a low-cost partner. This will help you reduce your cost and make a difference in the value proposition. Your project managers can stop wasting hours on routine administrative tasks and get back to their core functions — resolving issues and delivering projects.

So contact us and let's discuss how we can help. We promise that you will not outsource your control, only add services, which means you get best of both worlds.

## Benefits Realisation Service

Under constant pressure to improve customer service and meet demand, organisations use Return on Investment or (ROI) to prioritise funding of new projects.

A narrow focus on financial returns means calculating ROI is imprecise. As a result, project selection skews away from balanced consideration of the greater good.

Our team at PRISM, people use Benefits Realisation Management to help organisations rethink ROI assumptions; as technology and process specialists, our expertise leads to accurate understanding and valuation on 'intangibles' and qualitative criteria.

We can help your organisation build benefits realisation framework with artefacts necessary to ensure organisation is able to showcase the benefits being delivered by projects as part of your strategy execution.

## Our Talent Solutions Services

Our consulting and recruitment services in the area of talent solutions make a difference through our capabilities and selection processes and these include but not limited to as below

Candidates are shortlisted against strict selection criteria as agreed / defined by our clients so that our client's efforts are reduced and they get the right candidates

Our recruitment professionals and PM Consultants have extensive professional backgrounds from which to draw, and will work with your brand to develop a thorough understanding of your recruitment needs and to plan accordingly. The end result being that our clients get the most suitable candidates creating a win-win situation for Clients & Candidates.

We insist on honesty and respect and act most professionally at all times.
