

Environment policy statement

This is to confirm that Prism Consulting Services is committed to taking care of the environment. We will aim to continuously improve our systems and workplace to minimise and reduce the impact of our activities on the environment.

We are committed to protecting our environment. We aim to understand and control the impact we have on our environment.

We believe that we have role to protect our environment. This role includes ensuring that our economic activities provide suitable returns to our shareholders and benefit to the community in which we operate.

Our operations will fulfil the expectations of consumers and customers for quality products and services, and minimise any negative environmental impact. Prism Consulting Services seeks to ensure that our practices are sustainable in the future.

We will:

1. Ensure that environmental considerations are a part of our strategic and operational business planning activities where we will identify all potential and actual sources of air, ground and water pollution.
2. Review potential environmental impacts which occur in our business decisions and comply at least with the minimum legal requirements
3. Review our operations to continually improve efficiencies and the use of resources including energy, chemicals, water, packaging and other raw materials by maintaining and inspecting our systems of controlling pollution.
4. Minimise negative environmental impact by reducing, reusing and recycling onsite waste or by-products wherever practicable
5. Ensure safe waste disposal & use certified contractors where necessary
6. Implement an environment management system, which promotes commitment and involvement in our company
7. Achieve a level of environmental performance that meets and exceeds basic regulatory compliance by regular review of performance standards in line with community expectations
8. Use suppliers and contractors who conform to environmental management requirements and who can comply with this policy

We will review regularly to ensure this policy remains relevant to the needs of our stakeholders. We will be successful when we achieve our targets toward our goal of zero harm to the environment and are valued by the communities in which we work.

If you have any questions concerning this policy, please discuss this with your supervisor. This policy will be reviewed in 12 months or when changes are made to our Environmental Management System.
